Our assistance solution in brief

Information before and during travel

Before leaving, all travellers receive practical, medical and safety information. While travelling, they have direct 24-hour access to our network of medical providers and our information service.

Medical expenses

When treatment is needed abroad, our cover includes reimbursement, advance payment, or immediate payment of medical expenses.

Travel mishaps and travel insurance

We cover a comprehensive range of travel services, from trip cancellation through to baggage assistance (loss and delay), flight delays, legal protection, death and disability benefits, and cash advances.

Medical assistance

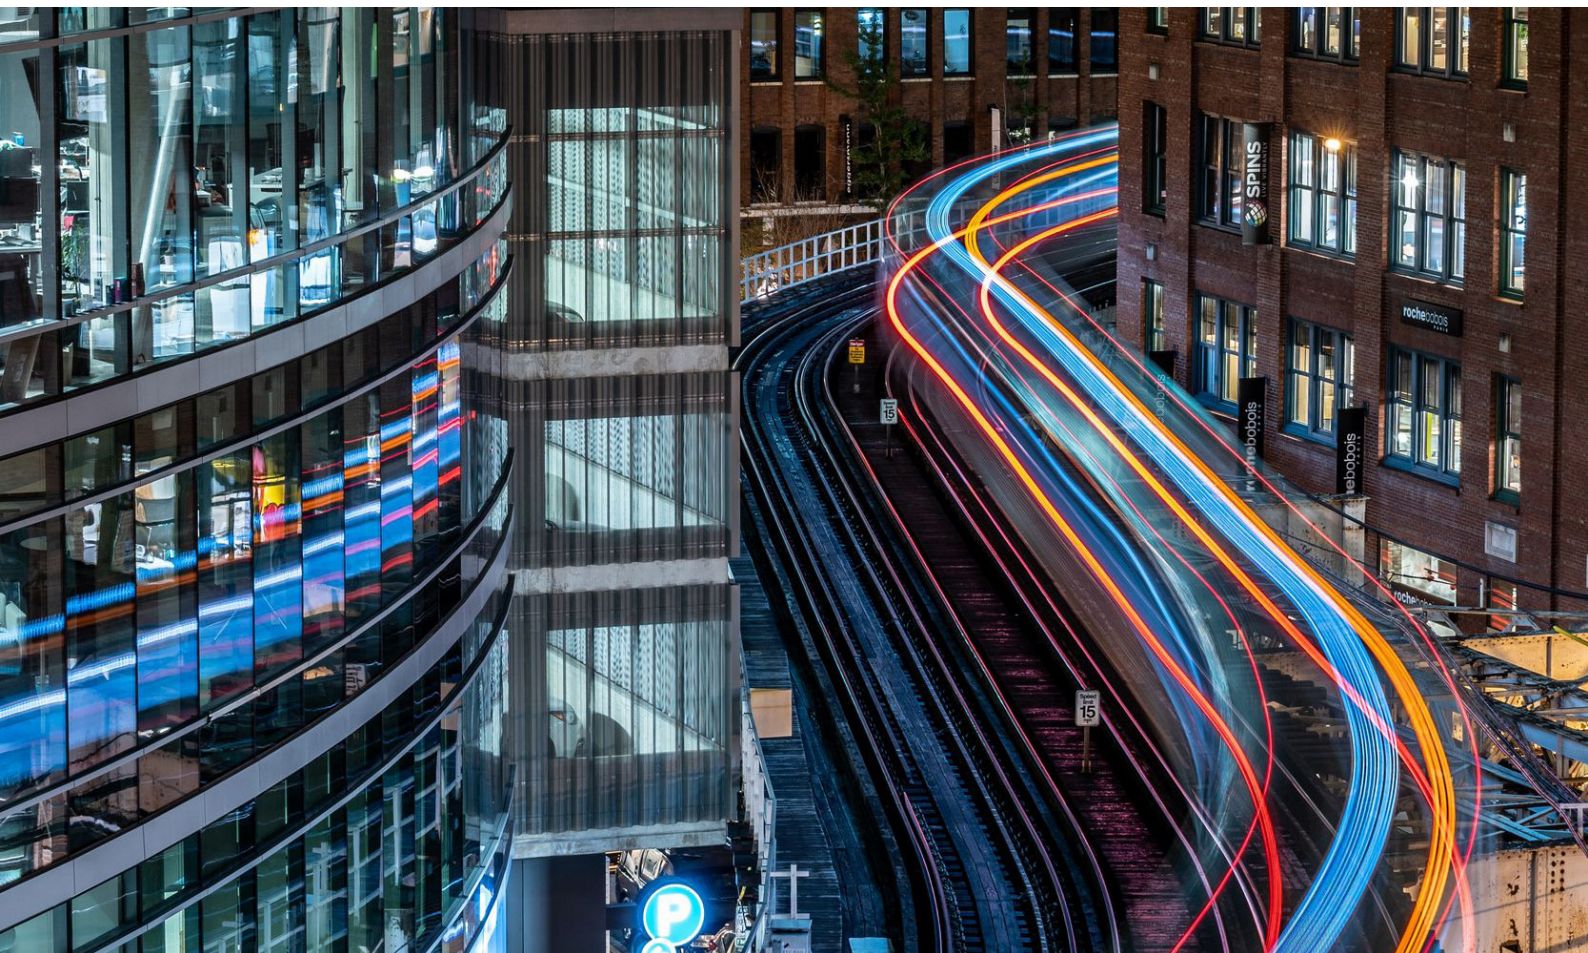

In the event of illness or accident, our medical assistance services cover search and rescue costs, hospitalisation and repatriation, as well as a second medical opinion. A helpline is available at all times to monitor care or follow up treatment.

Medical evacuation and repatriation

We organise on-site emergency assistance, medical repatriation back home or to a hospital (regardless of the country of residence), and repatriation in the event of death.

Security assistance

We issue real-time alerts in the event of a security situation and offer traveller tracking solutions. And if you run into trouble, we cover organisation of evacuations to a secure area as well as negotiations in the event of kidnapping.

Corporate Mobility insurance

– Assistance 24/7

In today's interconnected world, travel is an essential part of doing business. TSM offers a comprehensive insurance solution for medical assistance, security assistance and all travel-related issues, with no geographical exclusion. So whether you are looking for cover for your travelling employees, members of your association or NGO, or expats and their families, we can provide a range of specialist assistance to suit your business mobility needs. Our team is on hand 24 hours a day, 365 days a year to provide health and safety support, as well as immediate and effective assistance. Help is only a phone call away.

Immediate response in a crisis

In the event of a crisis, whether it is political unrest, a natural disaster, or an accident, we leverage our experience and expertise to effectively manage the situation and ensure the safety of your employees.

Managing the risks and health and safety issues involved in business travel is becoming increasingly complex. It calls for tailored solutions adapted to your particular needs.

Legal obligations regarding information, prevention and protection can be a minefield. We work closely with you to simplify your employees' travel by designing cover to facilitate these processes. At the same time, we organise preventive communications aimed at raising awareness among your staff.

Getting the help you need

Our services are available around the clock via our telephone helpline, mobile app and web portal. Our team is on hand to answer your questions and offer support whenever you need it.

Emergency repatriation

In critical situations, speed is of the essence. When trouble strikes, TSM offers emergency repatriation solutions. Whether it is a case of serious injuries, an acute medical condition, or a crisis situation in the field, our team is ready to intervene immediately. We coordinate the resources needed to get your employees to safety, whether this means back to their homes or a transfer to the most appropriate medical centre.

A network of excellence

With our global response network of 45,000 medical providers, you can be sure of immediate intervention wherever your employees are. Our network also publishes real-time safety and health information and monitors the situation during critical periods.

Insurance that recognises the value of your people

The greatest asset of a company is its people. Our insurance solution is designed to protect your employees when they travel for work, minimising the potential risks that could affect your business. We are by your side to provide help and support, whether to protect your reputation, anticipate legal impacts, deliver cover against financial penalties, or keep your staff motivated.

Protecting your reputation

Company reputations take a long time to build: a problem in a foreign country can quickly get out of hand and seriously affect your reputation. TSM provides proactive and effective incident management to safeguard your brand image. Your employees are our ambassadors, and their well-being is of prime importance to us at all times.

Anticipating legal impacts

Our Corporate Mobility insurance plays a key role in anticipating and minimising legal risks, such as corporate liability or potential regulatory breaches. Should an incident happen, our comprehensive, tailored assistance is designed to help reduce the likelihood of legal complications.

Protection against the risk of financial penalties

An unforeseen accident or incident can result in substantial financial penalties. Our insurance solution helps you minimise these risks and safeguard the financial stability of your business.

Taking the time to find the right replacement

Replacing an employee who is unable to work can be costly and difficult. By ensuring adequate assistance in the event of an incident, you can reduce the amount of time your employees are unavailable and maintain business continuity.

Keeping your employees motivated

When disaster strikes abroad, it can cause stress that can affect your employees' motivation to travel on business. We understand the importance of employee wellbeing and work hard to ensure their safety when they travel. Providing reassurance helps motivate your employees.
